ABOUT ME

I am an enthusiastic and dedicated Computer Science graduate eager to embark on a challenging career within an IT company. With a solid academic foundation and a keenness to apply my programming skills in a professional setting, I am committed to contributing to the success of projects. My proven ability to work effectively within a team-oriented environment, coupled with a strong dedication to continuous learning, positions me to stay adaptable and responsive to the ever-changing demands of the tech industry.

EDUCATION

Savitribai phule pune university Bsc Computer Science CGPA : 9.06	2024
maharashtra state board, pune HSC Percentage : 85.67	2021
maharashtra state board, pune SSC Percentage : 83	2019

TRAINEE AT INFOBEANS FOUNDATION,PUNE

JUNE 2024 - JUNE 2025

I participated in a comprehensive training program to master key company technologies, including Java, SQL, HTML, CSS, JavaScript, Spring Boot, Node.js, Express.js, and React.js. I enhanced my technical skills and domain knowledge through seminars and mentorship, while shadowing experienced professionals to gain insights into workflows and project development. Additionally, I contributed to project development, assisted with code reviews, and supported tasks such as requirements gathering, data analysis, and documentation.

SKILLS

- Java (J2EE, J2SE)
- Spring Boot, Hibernate
- ReactJS
- SQL (MySQL, PostgreSQL)
- HTML, CSS, JavaScript
- NoSQL (MongoDB)
- NodeJs, ExpressJs
- C Language, DSA
- Microservices

TOOLS

- VS Code
- Eclipse
- Git and GitHub
- IntelliJ IDEA
- Postman
- Docker

PROJECTS

Calibration Certificate Management System

- Tech Stack: Spring Boot, React.js, JWT Security, Apache POI, Mail API, MySQL
- JWT-Based Authentication: Role-based access for Admins and Users using Spring Security and JWT tokens.
- Mail Integration: Automated email notifications with certificate attachments sent to clients.
- Apache POI Integration: Dynamic generation of Excel-format calibration certificates with machine and service data.
- Modern UI with React: Interactive frontend built with React.js and Material UI for seamless user experience.
- Data Persistence: Used MySQL for efficient backend data handling.

Movie Booking Application

- Built a Movie Booking System using Spring Boot, RESTful APIs, MySQL, and Thymeleaf for a dynamic user experience.
- Implemented MVC architecture for user login, movie browsing, show booking, and booking history management.
- Developed admin dashboard for managing movies, theaters, and showtimes with role-based access control.
- Integrated email notifications for booking confirmations via JavaMail API.
- Utilized Spring Security for authentication and Spring Data JPA for database management.
- Ensured a secure and efficient application with unit testing using Postman and error handling for smooth user interactions.
